Slava Trofimov

Senior Front End Developer

Richmond Hill, ON L4C 1E5

slava@trofimov.ca

+1 289 980 8683

I'm working in the web development industry for more than 12 years and am familiar with all aspects of a website/app development cycle, from initial analysis and planning, creating wireframes to production deployment.

I have strong JavaScript, Vue.js, REST, CSS/SCSS, and HTML5 skills. For the last several years I've gained wide experience with Laravel and PHP in general and worked on many Laravel+Vue.js/Nuxt.js projects as a Lead developer.

Have wide experience with MySQL, WordPress, Opencart, and Electron.js.

I feel confident working with technologies like Git, Docker, Figma, Jira / ClickUp, Slack, etc.

Always seeking skill improvement and better practices.
